

PackMaster Line

Master the process from product to pack

PackMaster Line

The PackMaster Line combines three advanced Borncut technologies into one streamlined, fully integrated solution for protein processing. Using the precision of the BC 225S Portion Cutter, the smart portion distribution of the Equalizer and efficiency of the TrayLoader, the packing line delivers maximum yield, consistency and operational efficiency in one seamless flow.

- 2,170 cuts/min precision portioning
- Up to 70 trays/min high-speed loading
- Accurate cutting with less giveaway

The entire system is controlled through the BC 225S's integrated controller, featuring an intuitive drag-and-drop interface that simplifies operation and gives full control over portioning, distribution and tray loading.

- Maximize yield with optimized cutting and packing
- Adapt easily to multiple products and tray formats
- Save space with compact, hygienic system design

Applications:

- Fish fillets, poultry portions, pork cuts and more
- Suitable for retail packs, foodservice or industrial bulk trays
